

COPPER Plate Cu-ETP

Technical characteristics:	
Standard	UNI EN 12167/99, UNI EN 1652
Material designation symbol:	Cu-ETP
Density	8.93 kg/dm ³
Melting point	1083° C
Tensile strength	230 MPa min.
Hardness	65 – 90 HB
Elongation	12% min.
Chemical Properties:	
Copper (Cu)	99.90%
Oxygen (O)	0.04 % max.
Dimensional Properties:	
Dimensional tolerance	UNI EN 12167/99, UNI EN 1652
Standard thicknesses	From 1.5 to 5 mm
Standard Width	From 20 to 30 mm
Format	Bars or Rolls
Use:	
Industrial and civil construction
