

NATURAL ALUMINUM Strip

Technical characteristics:	
Reference standard	UNI EN 485-2, UNI EN 573-3
Base metal	Aluminum 99.5%
Type of alloy	Alloy series 3000
Physical state	H12
Chemical Properties:	
Manganese	1.0 – 1.5 %
Magnesium	0.2 – 0.6 %
Iron	0.7 %
Silicon	0.6 %
Mechanical Properties:	
Tensile strength	130 – 180 Mpa
Elongation	8.00 % min.
Dimensional Properties:	
Standard thicknesses	0.7 mm
Tolerances	UNI EN 485-4
Standard Width	670 mm – 1340 mm
Coil weight	From 100 Kg to 3000 Kg
Use:	
Industrial, civil and panel construction
